<p>Title: SYSTEM AND METHOD FOR COMMUNICATING CREDENTIALS</p>	
<p>Abstract: A system and method for conducting transactions involving the communication of credentials connected to an entity or an individual, known as the presenter to a permitted destination, known as the network endpoint following a request from an acceptor while maintaining the privacy in said credentials. The system includes presenting appliances and accepting appliances that communicate with a controlling server. The controlling server receives communication from the accepting and presenting appliances that contains a secret keycode exclusive to the individual or presenter, presenter identifies and a shared keycode and if the communications are matched, credentials specific to presenter identifier is permitted to be released to a known network endpoint.</p>
