## Kaeser

in respect of:

- (a) International Class 4 for oils for technical purposes, namely compressor oil, engine oil, heavy oil, penetrating oil, motor oil, industrial oil, lubricating oil, moistening oil, combustible oil, crank case oil, oils for blowers and vacuum pumps; lubricants; industrial greases; lubricating greases; paraffin; dust absorbing compositions; dust binding compositions for sweeping;
- (b) International Class 6 for pipes of metal; high-pressure pipelines of metal compressed air ducts of metal for ventilating and air conditioning installations; taps [cocks, spigots] of metal for pipes; collars of metal for fastening pipes; junctions of metal for pipes; elbows of metal for pipes; common metals and their alloys; building materials of metal; cables and wires of metal, not for electric purposes; branching pipes of metal; fittings of metal for compressed air ducts; fittings of metal for building; clips of metal for cables and pipes; containers of metal for air, compressed gas or liquid air; closures of metal for containers; metal sheets; flanges [collars] of metal; masts of metal; grease nipples; door fittings of metal; all aforesaid goods exclusively for and/or in connection with compressed air generation, compressed air distribution and compressed air treatment; parts of all the aforesaid goods, included in class 06;
- (c) International Class 7 for compressors for machines namely, reciprocating compressors and screw compressors; blowing machines; air suction machines; vacuum pumps being machines; rotary screw compressor units; reciprocating compressor units; pneumatic transporters; compressed air machines; compressed air engines; compressed air pumps; compressed air vessels being parts of machines; pumps being parts of machines, motors or engines; turbines, other than for land vehicles; machine tools; pneumatic hammers; filters being parts of machines, motors or engines; air filters for motors and/or compressors; catalytic converters for the adsorption of hydrocarbon vapors [gas catalytic converters]; activated carbon absorbers and catalytic converters, being parts of machines; activated carbon filters for use in compressed air systems, being parts of machines; high pressure filters being parts of machines; condensate separators being parts of machines; fans for motors and engines; radiators [cooling] for motors and engines; air condensers; air condensers; condensing installations; condensers [steam] [parts of machines]; de-aerators for feed water; oil separators being parts of machines, including de-oilers for separating oil from air; taps being parts of machines or motors; sealing joints [parts of engines]; regulators being parts of machines; speed governors for machines and motors; pressure regulators being parts of machines; valves being parts of machines, including pressure valves; pressure reduction valves being parts of machines; pneumatic controls for machines and motors; motors, other than motors for land vehicles; electric motors, other than for land vehicles; generators of electricity; housings [parts of machines]; leveling mounts for machines; stands for machines; tables for machines; stands for machines; tables for machines; couplings and couplings other than for land vehicles; belts for machines; belts for motors and engines; gear boxes, other than for land vehicles; ball-bearings; shaft couplings being machines; cranks being parts of machines; crank shafts; machine wheels; axles for pump diaphragms; superchargers; turbo compressors; fans for motors; pump diaphragms; anti-pollution device for motors and engines and compressors [machines] and motors; heat exchangers being parts of machines; machine parts for compressors, namely, safety valves and regulating valves; machine parts for compressors, machines and motors consisting of compressed air reservoirs; control and regulating devices for compressors, namely pneumatic, hydraulic

and mechanical regulators, all being parts of machines for compressors, blowers or vacuum pumps', pneumatic controls for machines, motors and engines;

- (d) International Class 9 for programmable electronic controllers for compressors, blowers, vacuum pumps and air treatment devices; wireless controllers to monitor and control the functioning of other electronic devices; electric installations for the remote control of industrial operations; electric regulating apparatus; electric regulating apparatus; electric relays; electric resistances; sockets, plugs and other contacts [electric connections]; switchboxes [electricity]; electric switches; terminals [electricity]; wire connectors [electricity]; electric wires; chips [integrated circuits]; optical condensers; optical data media; fibre optic cables; telecommunication transmitters; apparatus and instruments for conveying, distributing, transforming, storing, regulating or controlling electric current; transformers [electricity]; measuring apparatus and instruments; measuring devices, electric; pressure measuring apparatus, data processing equipment; recorded computer programs; recorded computer operating programs; computer programs [downloadable software]; computers; monitors [computer hardware]; computer peripheral devices; printers for use with computers; transmitters of electronic signals; computer memory devices; blank recordable CD-Rs and DVD-Rs; blank optical discs; magnetic tape units for computers; blank magnetic data carriers; blank optical data carriers; recording disc'; electric sensors; pressure sensors; temperature switches and sensors for monitoring, controlling and switching hydraulic or pneumatic systems included in class 09; apparatus for recording or transmission of sound or images; sound recording apparatus;
- (e) International Class 11 for air dryers; air filtering installations; air purifying apparatus and air purifying machines; air dryers, compressed air dryers; desiccant apparatus; refrigeration dryers; membrane dryers; drying apparatus and drying installations; drying devices; refrigerating apparatus, refrigerating machines and refrigerating installations; air cooling apparatus; refrigeration dryers; membrane dryers; drying apparatus and drying installations; drying devices; refrigerating apparatus, refrigerating machines and refrigerating installations; air cooling apparatus; condensate drains; heat exchangers, not parts of machines; water purification installations; water purifying apparatus and machines; water filtering apparatus; air filters for air conditioning; air filters for industrial installations and domestic use; air filters for air conditioning; air filtering installations; air filtering installations; air purifying lamps having a germicidal effect; apparatus and devices for the sterilization of air; regulating and safety accessories for gas devices; air purifying lamps having a germicidal effect; apparatus and devices for the sterilization of air; regulating and safety accessories for gas devices; taps [cocks, spigots] for pipes ionization apparatus for the treatment air or water.

The applicant claims that it intends to use the mark.

Priority claim is on the basis of an application filed on the 19<sup>th</sup> day of September, 2013 under number DE 30 2013 006 498.4/07 in Germany.

<p><b>Title: MODULAR SYSTEMS AND METHODS FOR DETERMINING CROP YIELDS WITH HIGH RESOLUTION GEO-REFERENCED SENSORS</b></p>	
<p><b>Abstract:</b> Systems, and methods for controlling a modular system for improved real-time yield monitoring and sensor fusion of crops in an orchard are disclosed. According to some embodiments of the invention, a modular system for improved real-time yield monitoring and sensor fusion may include a collection vehicle, a modular processing unit, a volume measurement module, a three-dimensional point-cloud scanning module, an inertial navigation system, and a post-processing server. As the collection vehicle travels through an orchard, the volume measurement module calculates volume measurements of the windrow, the three-dimensional point-cloud scanning module assembles point-clouds of each plant in the orchard, and the inertial navigation system calculates geodetic positions of the collection vehicle. The modular processing unit may fuse the collected data together and transmit the fused data set to a post-processing server. The post-processing server may process the geodetic position data for errors which may be used for geo-referencing the fused data.</p>
