Title: <b>WAVE ENERGY WATER CHANNELLING APPARATUS</b>	
<p><b>Abstract:</b> Disclosed is a wave energy water channelling apparatus, comprising a working platform (1), a floating unit (2), a plurality of first water channelling sets (3) and a plurality of second water channelling sets (4), wherein the working platform (1) is provided with a base pillar (11) fixedly connected to the ground of the bed, the first water channelling sets (3) and the second water channelling sets (4) are placed into the water, such that a water current can flow into the water channelling sets (3) and the second water channelling sets (4), and the floating unit (2) can move up and down relative to the working platform (1). The floating unit (2) is used to push the water current in the water channelling sets (3) and the second water channelling sets (4) such that the water current moves upwards into a water collection apparatus, and the potential energy of the water collection apparatus can be used for energy conversion and storage. The wave energy water channelling apparatus can add a different, environmentally-friendly power generation method, by using the wave movement of seawater in rising and falling to convert potential energy to electrical energy.</p>
